**Adress** : İstanbul / Turkey

## Summary

---

I am a Java Developer at Adesso Turkey, where I work on Tosla, a new-generation platform that meets the financial needs of young people, with or without bank accounts. Tosla is an innovative app that allows users to socialize and perform daily banking transactions with ease and security.

I graduated with a Bachelor's Degree in Computer Engineering from Sakarya University in 2019, with a High Honor Certificate for my academic excellence. I have also acquired multiple certifications and publications related to Java, C#, and Git. I am skilled in Java, JavaScript, CSS, jQuery, HTML, and Hybris structures, as well as cache management and openID connect. I am passionate about learning new technologies and solving complex problems with creative solutions. My goal is to contribute to society with my expertise in Java development.

## Personal Information

---

**Birth Date** : 01/1997  
**Marital Status** : Married  
**Driver's License** : B  
**Military Service Status** : Completed

## Education

---

**Bachelor's degree** : Sakarya University / Department of Computer Engineering/  
2015-2019

## Work Experience

---

### **Adesso Turkey (istanbul,Turkey)(Remote)**

adesso Turkey brings inventors, engineers and designers together to create digital products, provide continuity through quality assurance and offer custom software development & IT solutions. With our unique and modern development environment that empowers our mission-led teams within a lean structure.

Our group headquarters is based in Dortmund, Germany and we have over 9000 colleagues working at 62 different sites around the globe. Counting figures is getting harder each day as we grow rapidly! Check our website for latest information and more.

**Title** : Java Developer  
**Time** : 10/ 2022 – Until Now  
**Resource** : <https://www.adesso.com.tr/en/index-3.jsp>

### **Projects:**

#### **1. Borengo ( Electric Vehicle Management ) (Outsource) (TRY):**

Contributing to the development of a reliable, fast, and sustainable electric vehicle charging network, powered by 100% renewable energy, with an initial rollout of 500+ stations and plans to expand to 7,000 locations.

**Technologies:** Java 21, Spring Boot, Maven, Lombok, Docker, PostgreSQL, Azure.

#### **Key Contributions:**

- Developed backend services for roles, permissions, and CRUD operations.
- Implemented audit logging, ticketing, and Flyway-based database migrations.
- Integrated SAP, EPDK systems, and Azure file management.
- Deployed scalable solutions with Docker.

**Resource :** <https://www.borengo.com.tr/>

#### **2.TOSLA (AKBANK) (Outsource) (TRY):**

AkÖde, Turkey's first bank subsidiary e-money company, brings together young people on a new generation platform with its innovative Tosla application, where they can meet their financial needs. Young individuals can now download Tosla from app stores and easily start 'Tosla-ing', enabling them to socialize while performing their daily banking transactions.

**Skills** : Couchbase · Cache Management · Microservices · OpenShift · Gradle · Redis · docker · Apache Kafka · React.js · Kotlin · Spring Boot · SQL · Git · Spring Framework.

**Title** : Java SAP Commerce Cloud (Hybris)

**Time** : 06/ 2020 – 09/ 2022

### **Projects:**

#### **1.Turkcell Market Place (Outsource) (TRY):**

The Project Hybris is a B2B (business-to-business) commerce project. It is a project that utilizes many modules on Hybris, where Turkcell dealers conduct their shopping. In this project, a transition in UX (user experience) has been made on the storefront, and the site has been completely renewed to be compatible with the HTML sent by the customer. Java, JavaScript, CSS, jQuery, HTML, and Hybris structures have been used.

**Resource** : <https://www.turkcell.com.tr/yardim/online-alisveris>

#### **2. Be a Volunteer – Red Crescent Volunteers (Outsource) (TRY):**

It is an online volunteering platform. The digital system, where all units of the Red Crescent (Kızılay) manage their volunteer processes through a single system, also functions as a social communication network.

The system also serves as a social meeting point where individuals who want to volunteer can register, receive training for orientation and the volunteer areas they choose, participate in volunteer activities suitable for their region, interests, and qualifications, and share their experiences and contributions related to these activities.

**Technology Used** : Core Java ,HSQL, Jenkins ,AngularJS, SQL, Git, HTML5, CSS ,SAP Hybris ,JavaScript.

**Resource** : <https://gonulluol.org/>

#### **3. DU.AE (Outsource) (UAE):**

We want to delight our customers, be the employer of choice for the best talent, create optimal value for our shareholders through business excellence and innovation, and proudly contribute to the transformation of our community.

Technology: Core Java ,HSQL, Jenkins ,AngularJS, SQL, Git, HTML5, CSS ,SAP Hybris ,JavaScript.
